Video kits with memory

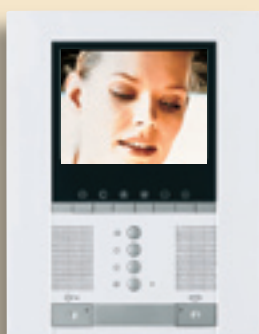

The video kit with memory can save the pictures and voices of visitors calling at the entrance panel. It also allows, using just 2 wires, audio-video communication and command of the door lock. Using special devices extra door locks can be commanded or the outside lights switched on.

The message recordings can be seen and listened to again by pressing just one key. The display zoom function (x2) can enlarge the pictures taken by the camera.

2 wire cabling (2 wire system)
